

xD

BLUEBIRD xD™

"After listening to players and casino operators, we designed an exciting new revolutionary cabinet that elevates the engagement of game content to a whole new experiential level. Not only does the *BLUEBIRD xD™* energize the gaming experience and content that exists today, but we've crafted this category-defining cabinet to complement content for years to come."

Paul Lesley
Director of Hardware Design

Inspired by Experience.

An Experience That Goes Beyond the Game.

The *BLUEBIRD xD™* (*BB xD*) earns its name, Experience Design, with a suite of sensory innovations that heighten the player experience beyond game content. By mastering every sensory element and implementing new levels of interactivity, this groundbreaking cabinet amplifies the player experience exponentially. The *BB xD* doesn't just introduce a new form factor to casino floors, it opens up a new dimension in gaming entertainment.

BLUEBIRD xD™

Ergonomically Designed.

Ergonomic screen-positioning enhances viewing; intuitively located player-interfaces heighten player intimacy and ease of play; optimal player seating-positions, generous leg clearance and an integrated footrest provide maximum comfort. All the way down to the synergy of a padded armrest and downloadable button panel, every detail of this crossover cabinet is designed with the player's comfort and convenience in mind.

- 22" or 32" high-definition top widescreen
- 22" high-definition bottom widescreen
- Low 60" dual-screen height
- Capacitive touch
- Optimum viewing angles with reduced glare
- Dynamic & fully programmable button panel
- Space for networking gear provided in base
- Comfort and sightlines of a slant-top cabinet
- Convenience of an upright gaming machine
- Multiple configuration options available
- Superb speed and ease of serviceability

The 32 inch Metascreen and arm rest button are not available options on the initial BLUEBIRD xD release, but will be available options on future releases.

Elevating the Celebration.

A state-of-the-art emotive lighting system creates a first-time-ever bank-level celebration based on in-game activity. This new dimension of interactivity draws players in, with choreographed lighting that underscores their individual experience.

- Celebrates Big Wins
- Highlights Bonus Events
- Builds Anticipation

The 32 inch Metascreen and arm rest button are not available options on the initial BLUEBIRD xD release, but will be available options on future releases.

Stunning Sound.

The advanced BOSE® sound system preserves audio clarity and bass power regardless of volume to create brilliant sound quality. Patented signal processing technology enables you to hear soft sounds (particularly dialogue) even at low volumes-and still appreciate the impact of loud special effects.

A New Form Factor.

With the powerful *CPU-NXT*^{®2} technology platform and the option of networked game enablement, the *BLUEBIRD xD*[™] brings a new category of slot-game entertainment to the forefront. Creating for the very first time an interactive experience between the gaming cabinet and advanced WMS game play features, the *BB xD* offers a fully engaged and one-of-a-kind experience for slot players.

The 32 inch Metascreen and arm rest button are not available options on the initial *BLUEBIRD xD* release, but will be available options on future releases.

Powerful Options.

- Available in Video and 3-Reel or 5-Reel Mechanical Transmissive Reels® versions
- Allows operators to alternate from Video to Mechanical

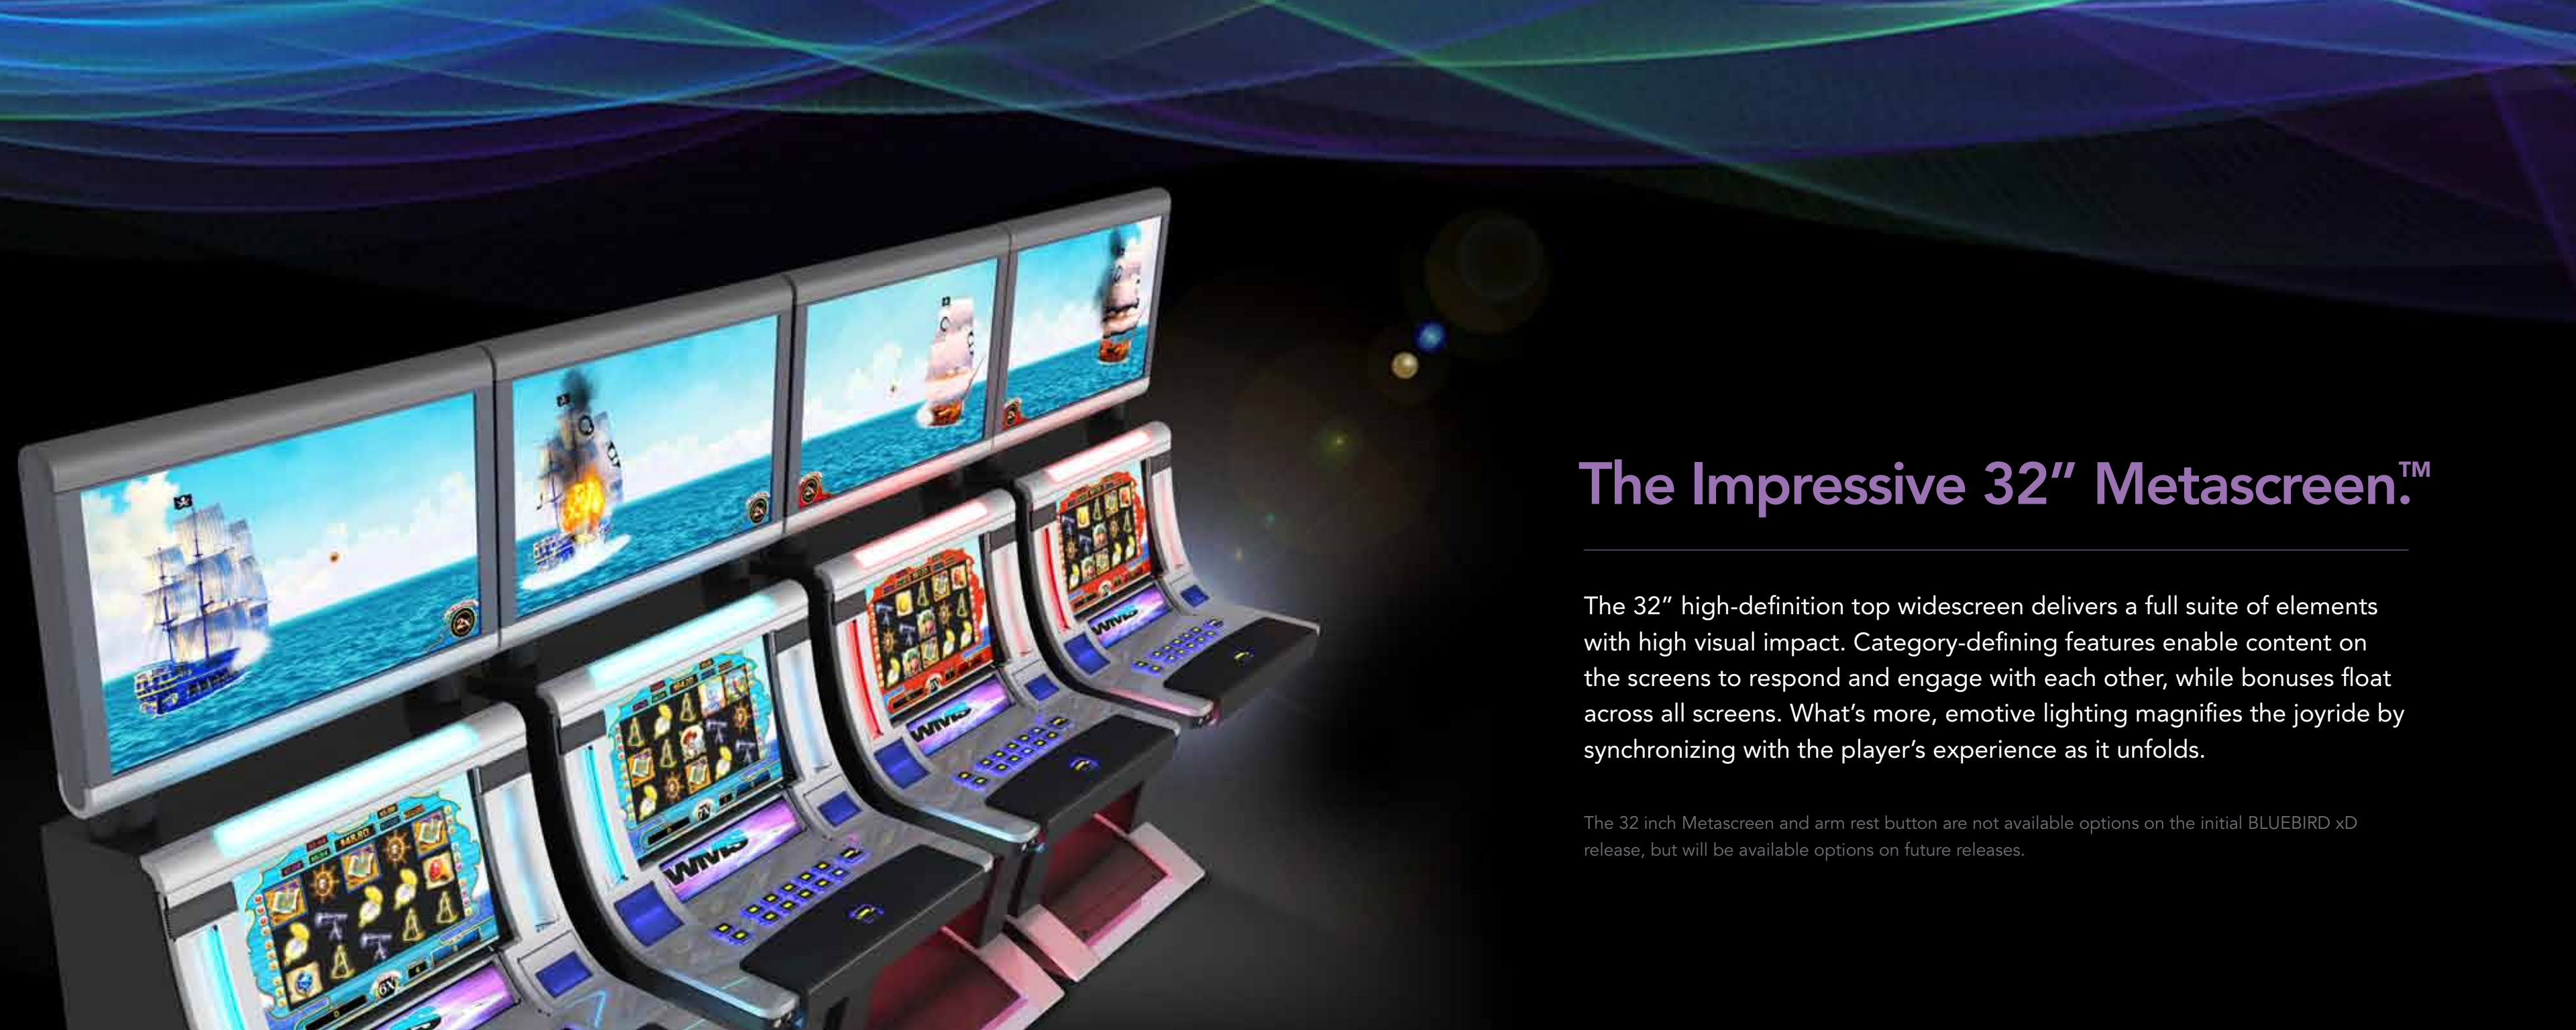

Video

Mechanical

- Allows for all aspects of Networked Gaming
- Configuration options provide for unique gaming experiences

The 32 inch Metascreen and arm rest button are not available options on the initial BLUEBIRD xD release, but will be available options on future releases.

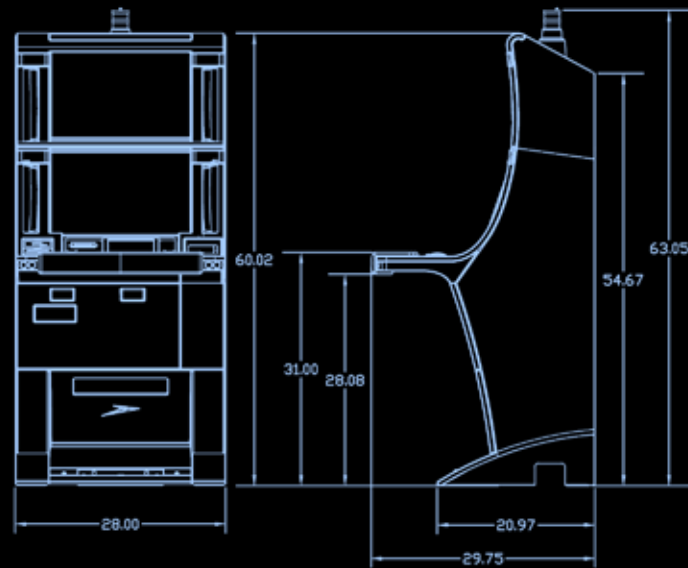

The Impressive 32" Metascreen.™

The 32" high-definition top widescreen delivers a full suite of elements with high visual impact. Category-defining features enable content on the screens to respond and engage with each other, while bonuses float across all screens. What's more, emotive lighting magnifies the joyride by synchronizing with the player's experience as it unfolds.

The 32 inch Metascreen and arm rest button are not available options on the initial BLUEBIRD xD release, but will be available options on future releases.
